--21. In combination, a liquid delivery system having a liquid-containing surface and a thrombosis-preventing seal in contact with said surface, said seal comprising a pharmaceutically-acceptable liquid containing taurolidine, taurultam or a mixture thereof and further containing an anticoagulant agent other than taurolidine or taurultam.

22. The combination of claim 21 wherein said anticoagulant agent is selected from the group consisting of aprotinin, hirudin, desirudin, danaparoid, danaparoid-sodium, pentosan, pentosanpolysulfate-sodium, ticlopidine, clopidogrel, and mixtures thereof.

23. The combination of claim 21 wherein said taurolidine is present in an amount of from about 0.5 to about 3% by weight or said taurultam is present in an amount of from about 1 to
